Mayodan Wastewater Treatment Plant Mayodan, North Carolina

HUA completed a study that evaluated consolidation of three municipal wastewater systems in Madison, Stoneville, and Mayodan, North Carolina. The project evolved into consolidation of the three systems and expansion of the Mayodan WWTP to accommodate flows from the other municipalities. HUA helped obtain over \$5.7 million in funding for the project from the Clean Water Management Trust Fund, the North Carolina Rural Economic Development Center, and the North Carolina State Revolving Loan program.

As part of the funding requirements, HUA completed a 201 Facilities Plan and design of the West Rockingham County wastewater system. HUA designed pumping systems for Madison and Stoneville to a new sewer outfall and an upgrade of the WWTP in Mayodan from 3.0 MGD to 4.5 MGD. HUA also provided construction management and inspection for the project.
